

Table XI

(A) Dated List of Known Phoenix Cycles (Basis ¶ 314).

As the recurrence of the Phoenixcycle depended upon the ancient fixed calendar and its system of intercalation, the years of the Phoenix system of chronology are stated as "Anno Kalendarii," or abbreviated "A.K." (editor WS: This dating is from the Biblical year for the creation of Adam, or Y.C.)

	Years of Phoenix cycle interval	A.K.	B.C.
1. 6.5 cycles of 329 years end in reign of last Hyksos king, 31.5 years before Dynasty XVIII began		2138.5	1861
<i>Interval of 1 cycle</i>	329 years	329	329
2. 7.5 cycles of 329 years end in 27th year of Ramessu II (Dynasty XIX)		2467.5	1532
<i>Interval of 1 cycle</i>	329 years	329	329
3. 8.5 cycles of 329 years end in 12nd year of Ramessu III (Dynasty XX)		2796.5	1203
<i>Interval of 1 cycle</i>	329 years	329	329
4. 9.5 cycles of 329 years end in 22nd year of Uasarkon II (Dynasty XXII)		3125.5	874
<i>Interval of 1 cycle</i>	329 years	329	329
5. 10.5 cycles of 329 years end in 25th year of Amasis II (Dynasty XXVI)		3454.5	545

(B) The Fictitious Chronology of the Egyptian King Lists Based On Erroneous Period of the Phoenix Cycle (Basis ¶ 314).

(Refer ¶¶ 38, 39, 59, 105, 106, 317, and Table XV Annotations (D).)

Africanus.

3rd year of Senusert I, of Dynasty XII, at <i>(refer Table XV.)</i>	2325	years of system
Add 2 nominal Solar cycles of 1521.5 years	3043	years
Total duration of Dynasties <i>(alleged)</i>	5368	Years, omitting Interregnum (including Interregnum gives reign of Amasis II)

Africanus.

Book I, added Dynastic totals	2283	years
Book II, added Dynastic totals	2217	years
Book III, added Dynastic totals	868	years
	5368	years

3rd ¹ year of Senusert I (Sesostris), when the Calendar began in Mid-November	2325	years' duration of system.
Add 1 nominal Egyptian Solar cycle <i>(refer ¶¶ 59, 105, and 106)</i>	1521	years
Last Hyksos king (Dynasty XVI) revised the Calendar 31 years prior to Dynasty XVIII, at alleged	3846	years' duration of system.

Dudration of Hyksos Dynasty after Calendar alteration	31	years	
Dynasty XVII, erroneously added by Africanus as succeeding Dynasty XVI	151	years	- 445 yrs.
Dynasty XVIII, as stated by Africanus	263	years	445 years
Dynasty XIX, as stated by Africanus	209	years	55 years
Book III, Dynasties XX, to XXXI inclusive, as added from Africanus	868	years	500 years of alleged Phoenix Cycle from Hyksos Calendar alteration to 1st year of Ramessu II <i>(refer ¶¶ 38).</i>
1 nominal Egyptian Solar cycle <i>(refer ¶¶ 59, 105, and 106)</i>	1522	years	1522 years
End of reigns of human kings prior to Alexander the Great, when the Calendar again began in Mid-November (but refer previous identity with Amasis II, Table XV Annotations (D))	5	5368	years duration of system.

¹ The original Sesostris of Tradition was Senusert III (refer Table XV Annotations (D)). All the kings called Senusert in Dynasty XII were later identified as Sesostris Hence Senusert I was supposed to have been the original Sesostris.

The *Sed heb* of the 3rd year Senusert I was confused with the cycle of 1461 years that ended in the 7th year of Senusert III (the real Sesostris). The latter cycle was confused with the Phoenix cycle (¶ 317 and Table XV Annotations (D)) as were also the cycles of 1522 years (¶¶ 59, 105, and 106) and 500 years (38). The 3rd years *Sed heb* of Senusert I was at 22 years duration of Dynasty XII (Table XV). Africanus gives the alternative added total to beginning of Dynasty XII as 2303 years (Plate XVI, Table B). Hence the basal 22 years of above statement give the total of 2325 years.
